LONG-TIME AGRICULTURAL PROGRAMS IN THE UNITED STATES

NATIONAL, REGIONAL AND STATE, 1921-1927*

Compiled by Mary G. Lacy, Librarian,
Bureau of Agricultural Economics,
U. S. Department of Agriculture,
Dec. 21, 1927.

NATIONAL

Association of land grant colleges. Report on the agricultural situation by the Special committee of the Association of land grant colleges and universities appointed by the executive committee of the Association. Submitted by the executive committee to the executive body of the Association at the 41st annual convention, Chicago, Illinois, November 15 to 17, 1927. Chicago, 1927. 40p.

Business men's commission on agriculture. Report on agriculture. Press release Nov. 13, 1927. 9p. Mimeographed.

Among the other recommendations of the Commission is one for the development of a carefully planned national policy of land utilization in order to bring about a balanced agricultural production, the highest efficiency of the agricultural industry, the sustained prosperity of the farmer and the preservation of the nation's natural resources.

Jardine, W. M. An American agricultural policy. 192- (Manuscript in Library, Bureau of Agricultural Economics)

This paper outlines (1) the fundamentals of an agricultural program for the United States, (2) activities which a domestic agricultural policy should encourage, and (3) the relation of foreign competition and demand to a national agricultural policy. It contains also notes on the supply and the demand sides of agricultural competition, and demand in foreign countries.

Jardine, W. M. Stabilizing farm prices. (In U. S. Dept. of agriculture. Official record, v.6, no.33, Aug. 17, 1927, p. 2,3,7)

"A comprehensive agricultural policy must be adopted which will improve the economic position of agriculture by methods respectively appropriate to the various problems.

"Such a policy should aim to increase the net income of farmers, by improvement in the production and merchandising of farm products, and

---

In this list an attempt has been made to include only material based on actual surveys of conditions with some exceptions in the National Section. The list is therefore only a partial revision of Agricultural Economics Bibliography No. 5, and does not entirely supersede it.

by a better adjustment between agriculture and other fields. It should aim to provide in the country opportunities equal to those offered in cities for persons of comparable ability.

"The purpose obviously is a higher standard of living, including better rural homes, more of the conveniences of life, and better facilities for education, health and recreation.

"This is an attainable ideal, worthy of the best efforts of farmers, their organizations, and their government."

Merritt, Eugene. State agricultural program building ... Washington, D. C., Extension service, Office of cooperative extension work, U. S. Dept. of agriculture, 1925. 45 p. Mimeographed.

National industrial conference board, inc. The agricultural problem in the United States. New York, National industrial conference board, inc., 1926. 157p.

"The development of sound, far-sighted national policies in respect to agriculture, is ... one of the most important problems before the country today. Our agriculture is now going through a crucial transition in its character and in its relationship to our national economic life. The success or failure of this readjustment will be of the greatest significance for our future. We have as a people to determine deliberately and wisely the role which we wish to have agriculture play in our national economic life, in the light of full knowledge as to whether and in what respects its position is weak and why, and on the basis of sound judgment as to how it can best be strengthened.

"In the development of such policies and the determination of such questions it is the duty of all groups to take part."

U. S. Congress. Joint commission of agricultural inquiry. Report, Pt. 1, The agricultural crisis and its causes. 1921.

The introduction to this report summarizes the recommendations of the commission for action by both Federal and State governments for the improvement of the agricultural industry. These "recommendations contemplate, in addition to legislation within the jurisdiction of Congress, action by State authorities within their respective jurisdictions and local and private interests, in order to achieve the objects sought."

U. S. Dept. of agriculture. Bureau of agricultural economics. Agricultural outlook for 1923-1927. Washington, 1923-27.

1923, the first outlook report published was mimeographed in two parts, no. 1, April, no. 2, July.

1924-1927 are U. S. Dept. of agriculture. Miscellaneous circular nos. 23, 38, 65, 101.

These annual outlook reports "have been prepared by the

182492

U. S. Department of Agriculture to provide a better base upon which farmers may make plans for the coming season, and especially to aid leaders in the cooperative movement in formulating production and marketing programs. They are based upon surveys of conditions affecting agricultural production and demand at home and abroad at the present time."

U. S. President. Coolidge. Message of the President of the United States communicated to the two houses of Congress at the beginning of the second session of the Sixty-ninth Congress, 1926. Washington, Govt. print. off., 1926. 20p. (69th Cong., 2d sess. House doc. no. 483)

"The whole question of agriculture needs most careful consideration. In the past few years the Government has given this subject more attention than any other and has held more consultations in relation to it than on any other subject. While the Government is not to be blamed for failure to perform the impossible, the agricultural regions are entitled to know that they have its constant solicitude and sympathy. Many of the farmers are burdened with debts and taxes which they are unable to carry. We are expending in this country many millions of dollars each year to increase farm production. We ought now to put more emphasis on the question of farm marketing. If a sound solution of a permanent nature can be found for this problem, the Congress ought not to hesitate to adopt it."

U. S. President. Coolidge. Message of the President of the United States communicated to the two houses of Congress at the first session of the Seventieth Congress, 1927. (In Congressional Record, v. 69, no.2, Dec. 6, 1927, p.103-109)

Agriculture: p. 105-106.

Wallace, Henry C. A national agricultural program - A farm management problem. (Jour. of Farm Economics, v. 6, no. 1, Jan. 1924, p.1-7)

"A national agricultural program worthy of the name must include consideration both of what it is practical to do and what ought to be done to help agriculture bridge over the present depression, and what must be done to build a stable and thoroughly sound agriculture for the future."

This article was reprinted in the Annals of the American Academy of Political and Social Science, Jan. 1925, p.124-128.

REGIONAL

U. S. Dept. of agriculture. Extension service. Office of cooperative extension work. Report of the Committee on agricultural programs of the American farm-economics association meeting, McAlpin Hotel, New York city, December 28 to 30, 1925. Washington, D.C., 1926? 4p.

New England

Gilbert, Arthur W. The food supply of New England. Prepared under the auspices of the executive committee of the New England Agricultural Conference. N.Y., Macmillan, 1924.

This volume "is the outcome of a conference held in Boston in January, 1923, called by the governors of the six New England States for the purpose of beginning a concerted study of the food question. According to the preface 'The conference set itself to take an inventory of the present situation and to lay out a ten-year program for New England agriculture. A summary of the programs formulated by each commodity committee forms one chapter of this book. The work of the conference is now being actively carried on by a Continuance Committee acting through a small executive committee. New England is one economic unit. It is logical that the various agencies of the six States should work together to solve the problem."

South

Association of southern agricultural workers.

In the Experiment Station Record for March, 1927, v.56, no. 4, p.399, the twenty-eighth annual meeting of this Association at Atlanta, Ga., Feb. 2 to 4, 1927, is reported in part as follows:

"A program for agricultural development with the idea of bringing about greatly needed improvement in farming conditions, as set forth in resolutions adopted, recommends the abandonment of agriculture on unproductive lands and intensive cultivation of the productive lands for special purposes, adequate Federal and State appropriation for extension work, continuation of the Federal crop reporting service, particularly in regard to cotton, and formulation of a permanent merchant marine policy by the Government."

STATE

Alabama

The agricultural and farm home program for Alabama. (Ala. Polytechnic institute. Ext. serv. Circ. 77, Jan. 1925)
Consists of the report of the meeting of extension workers and farm people in Auburn, Ala., Dec. 29, 1924, to Jan. 2, 1925. The object in publishing it is for the county workers and others interested to use it as a guide - a program of work for 1925 and succeeding years, with such modifications as may be made from time to time. The names of those who prepared each report appear at the end of the report.

Gist, F. W. ... A permanent program of agriculture for Alabama. (In Farm economics, v. 1, no. 5, March 1, 1926, Auburn, Alabama, p.23-25)

Safe farming in Alabama. Proceedings of Safe farming conference held in Auburn, December 20-21, 1923. (Ala. Polytechnic institute, Ext. serv. Circ. 66, Jan. 1924)

"Late in 1923 the Alabama Extension Service and the Alabama Experiment Station received an exceptionally large number of requests from farmers for information as to what to do in 1924. An analysis of the requests, and also of information collected in the field and from the press, indicated clearly that the farmers, bankers, merchants, editors, and professional men of Alabama earnestly desired a permanent program for agriculture.

"These requests caused a State-wide safe farming conference to be held at Auburn, December 20-21, 1923. Delegates representing all phases of agriculture and its related interests participated in this conference. This circular 66 of the Extension Service contains the program worked out at this conference."

Colorado

McCann, Roud, and Summers, Thomas H. Colorado's agriculture. (Colo. Agr. col. Ext. serv. 1924?)

This report, made by the Director of Extension and the Farm Management Specialist of the Colorado Agricultural College deals with "some of the problems having to do with adapting agricultural production to market requirements ... The recommendations are not aimed primarily at the year 1924 or 1925 but look forward to the development of agriculture in Colorado during the next 5 or 10 years." After making a few general recommendations that will apply to practically every farm, the specific agricultural commodities produced in Colorado are taken up separately and in detail.

Summers, T. H., and Smith, E. D. An agricultural program for the Arkansas valley of Colorado. Nov. 1925, 43p. (Colo. Agr. col. Ext. serv., no.239-A)

Summers, T. H., and Smith, E. D. An agricultural program for the San Luis Valley of Colorado. Aug. 1927. 64p. (Colo. Agr. col. Ext. serv. Bul. 267a)

This bulletin deals with an agricultural economic conference held at Alamosa, Colorado, on Feb. 24 and 25, 1927, at which some recommendations for future development of agriculture in this region were formulated.

Florida

No published program found.

Georgia

A farm program for Georgia for 1925. (Ga. Cotton Pool News, v.1, no. 39, Feb. 1925, p.1)

This program is signed by the Georgia Commissioner of Agriculture, the Director of Extension Service, the President of the State College of Agriculture, and others. The program is presented under five heads as follows: (1) Crops in Georgia must be diversified; (2) Farmers must be financed in making their crops and in operating their farms; (3) The principle of cooperative marketing should be applied generally in the marketing of farm products; (4) Inasmuch as any development program is predicated on adequate leadership, we desire to indorse those types of higher education necessary to develop a sufficient number of Georgia's rural boys and girls to make the agriculture of the State efficient and self sustaining; (5) There should be county units for the purpose of helping the farmer to promote a diversified agriculture, to properly educate his children, to better his methods of production and in general to bring about community welfare.

Georgia, Dept. of agriculture. Georgia agriculture. State and county. Part I. Georgia by sketch and illustration. Part II. Agricultural aids and facts. Part III. Statistics, State and county. Atlanta, 1924. 208p. (Ga. Dept. of agr. Quarterly bul. 96, April, May, June, 1924)

Weiss, H. B. Graphic summary of New Jersey's changing agriculture by counties. (N. J. Agr. dept. Circ. 75. 1924) 52p.

New Mexico

New Mexico. College of agriculture and mechanic arts. Extension service. Economic survey and conference Elephant Butte irrigation district, February, 1927. Outline reports and summary of recommendations. Conference held at State College, New Mexico, February 15-16, 1927. El Paso, Texas. February 18-19, 1927. State College? 1927. 44lp. Mimeographed.
"The economic survey and conference was made possible by the financial cooperation of the United States Extension service, Division of demonstrations on reclamation project, the United States Bureau of agricultural economics, the Agricultural and mechanical college of Texas, and the New Mexico College of ag-

riculture and mechanic arts."

Covers "the area in New Mexico and Texas officially known as the Rio Grande Federal Irrigation Project, but more popularly known as the Elephant Butte Irrigation Project."

New York

Warren, G. F., and others. The apple situation in New York State. A preliminary report. Ithaca, New York State college of agriculture at Cornell University, 1927. 44p.

North Carolina

Forster, G. W., and Saville, R. J. Profitable farm combinations adapted to the lower coastal plain of North Carolina. June, 1927. 46p. (N. C. Agr. Exp. Sta. Bul. 252)

Forster, G. W., Saville, R. J., and Hutson, J. B. Profitable farm organizations for the coastal plain of North Carolina. June, 1926. 33p. (N. C. State Col. of Agr. and Eng. Bureau of Economic and Social Research. Research Bul. No. 1)

Farm programs have been worked out for two areas each consisting of several counties of North Carolina. In each case outlines of farming systems showing the acres of the different crops and the numbers of the various classes of livestock that appear best adapted to the most common sets of requirements to the area are given. These outlines are based upon normal crop requirements and yield. Livestock records, production, and prices are found in the two bulletins by G. W. Forster and others noted above. Similar programs are being worked out for two other areas.

North Carolina. State college of agriculture and engineering. Agricultural extension service. Preliminary agricultural program for Western North Carolina. March 1926. 28p. (Its Extension Circ. 157)

North Dakota

Willard, R. E., North Dakota farm program for 1927. Fargo, Feb. 1927. 4p. (N. D. Agricultural col. Agricultural extension div. Circ. 74)

Willard, R. E., and Fuller, O. M. Type-of-farming areas in North Dakota ... Fargo, N. D., July, 1927. 268 p. (N. D. Agr. Exp. Sta. Bul. 212)

Issued in cooperation with Bureau of agricultural economics,

U. S. Department of agriculture.

"In many cases the conditions gradually change from one area to another and it is not always possible to locate a line of demarcation definitely between areas. In other cases, known conditions make it possible to quite definitely locate areas of similar conditions. The location of these areas is indicated on p. 235."

Ohio

Ohio. State university. College of agriculture. Extension service. Ohio's rural program. Papers read at the Conference held at the Ohio State University during Farmers' Week, Feb. 4 to 8, 1924, also problems and suggested solutions as outlined by the College of Agriculture and approved by a committee of twenty-two farm men and women meeting at the Ohio State University, March 31, 1924. Columbus, O. 1924. 120p.

Oklahoma

Conner, W. A. Suggestions for a State policy in agriculture. (Okla. Agr. Ext. Circ. 159, 1922)

"Those in a position to influence agricultural tendencies and practices can ill afford longer to postpone the adoption of a definite policy in agriculture. The delay has already placed unnecessary burdens on the next generation ... Despite the fact that various farm organizations, bankers financing agriculture, commercial organizations, the farm press and agricultural colleges have accomplished some splendid results in a sort of detached way, it yet remains for these agencies to unite on a policy in agriculture that would bring about unity of effort in dealing with the problems of agriculture and result in better living conditions and permanent profitable production."

Knapp, Bradford. Safe farming for 1927 ... Sound reasons for a sound business policy in acreage reduction. Stillwater, 1927. 19p. (Okla. Agricultural and mechanical college. Extension serv. Circ. 232. General series 71)

Oregon

Maris, Paul V. An agricultural program for Oregon. (Oreg. Agr. col. Ext. serv. Ext. bul. 367, Oct. 1923)

This bulletin endeavors to present Oregon agriculture as it is, analyze the factors that have a bearing upon its further development, and suggest the general outlines of a program for the guidance of all agencies concerned with agricultural improvement.

Oregon agricultural economic conference. Report of Oregon agricultural economic conference. Oregon Agricultural College, Jan. 23-25, 1924. 78p. (Oreg. Agr. col. Bul. 393, April, 1924)

This report is a condensed declaration of the findings and recommendations of the commodity groups of the Agricultural Economic Conference as adopted by the general conference at Corvallis, Oregon, Jan. 23-25, 1924. Taken together, these statements constitute the foundations of an agricultural program. The Agricultural Economic Conference was called to form an agricultural program for Oregon based upon a comprehensive study of production and marketing possibilties, and to coordinate the efforts of all essential agencies in putting the program into effect.

Pennsylvania

Agricultural conference, Harrisburg, Pa. 1923. Report of agricultural conference held in Senate caucus room, Capitol building, Harrisburg, Pa., Feb. 20-21, 1923. 42p. (Pennsylvania. Dept. of agriculture, v. 16, no. 2, March 1923. General bul.no. 373)
The conference was divided into commodity committees each of which prepared a program believed to be in the interests of the best development of the industry.

Berger, A. C., Taylor, P. R., Critchfield, B. H., and Kifer, R. S. Agricultural production and marketing in Lebanon County, Pennsylvania, a report of the results of a survey of agricultural conditions in Lebanon County, Pennsylvania, for the purpose of furnishing an economic basis for a production and marketing program. Sept. 1925. 48p. (Pa. Agr. Exp. Sta. Bul. 198)

Rhode Island

Corbett, R. B. Some economic phases of the fruit industry in Rhode Island. Jan. 1927. 72p. (R. I. Agr. Exp. Sta. Bul. 207)

South Carolina

Spartanburg County council of agriculture. A program for the agricultural development of Spartanburg County, May 7, 1924. Spartanburg, S. C., 1925, 4 p.
Issued by Spartanburg County Council of Agriculture, "which is a group of about twenty-five farmers and business men who are interested in better agriculture for the county." This pamphlet was distributed by the Extension Service of Clemson Agricultural College.

South Dakota

Rogers, R. H., and others. South Dakota's agricultural program. Aug. 1925. 84p. (S.D. State college of agr. Ext. serv. Extension circ. 230)

Tennessee

Allred, C. E. Economic and social study of Tennessee. 64p. (Univ. of Tenn. Record. Extension Series, v.1, no.5, Dec. 1924)
"In all parts of the country there is a movement toward the preparation of State programs for economic and social improvement. Some of these have taken the form of a strictly agricultural program, while others are broader and recognize the inter-relations and inter-dependence of each phase of our economic structure. In Tennessee there has been considerable discussion of a State program, and it is to assist in the formulation of such that this bulletin has been prepared."

Brehm, C. E. Ten years of agricultural progress in Tennessee. 64p. (Tenn. Col. agr. Ext. div. Publication 131, Dec. 1924)

Gives a survey of the agricultural history of Tennessee and the broad outlines of an agricultural program believed to be for the best interests of the State.

Tennessee. University. College of agriculture. Division of extension. A farm program for Tennessee. May 1926. 11p. (Its Publication 141)

Texas

Texas. Agricultural and mechanical college. Extension service. ... A safer farming program for Texas. College Station, 1927. 24p.

Texas. Agricultural and mechanical college. Extension service. A suggested safe farming program for Texas. First produce actual necessities of food and feed, then consider cash crop.

Utah

No published program found.

Vermont

No published program found.

Virginia

Virginia agricultural advisory council. A five-year program for the development of Virginia's agriculture, worked out by the Virginia agricultural advisory council, Dec. 1924. Distributed by the State Department of Agriculture, Richmond, Va.

More economical methods of production, better methods of marketing, the production of more home supplies, and the fitting of production to consumption are the main features of the program. County advisory councils are strongly recommended to develop long-time programs for each county.

Langsford, E. L. and Hutson, J. B. Systems of beef cattle farming for southwestern Virginia ... Blacksburg, Va., 1927. 47p. (Va. Agr. Exp. Sta. Bul. 258, June 1927)

Issued in cooperation with the Bureau of animal industry and the Bureau of agricultural economics of the United States Department of agriculture.

Systems of farming and methods of handling cattle believed to be more profitable than those usually followed in Southwestern Virginia are presented in this bulletin.
